

§ 930.120

must meet the following terms and conditions:

(1) In order to receive a certificate, a grower must demonstrate, to the satisfaction of the Board, that rows or trees which were selected for diversion were not harvested. Trees six years old or younger do not qualify for diversion.

(2) The grower must furnish the Board with a total harvested production amount so the Board can calculate the amount of grower diversion tonnage to be placed on the diversion certificate. The Board will confirm the grower's production amount with information provided by handlers (to which the grower delivers cherries) on Board Form Number Two.

(3) The grower must agree to allow a Board compliance officer to visit the grower's orchard to confirm that diversion has actually taken place.

(c) *Calculation of diversion amounts.* The weight of cherries diverted and left unharvested shall be calculated by the Board after growers furnish the Board with the necessary information concerning their production. After verification of the volume of cherries diverted, the Board shall calculate the amounts of grower diversion tonnage to be placed on the diversion certificates and issue such certificates to growers. Such amounts shall be determined as follows:

(1) For whole block diversion, the weight of a harvested sample of 5 percent of each diverted block, provided by the grower, will be used to calculate the total volume of diverted cherries to be credited on the diversion certificate. For example, a grower farms 1,000 acres and elects to whole block divert a 200 acre block. If 5 percent of the harvested trees in the block diverted yield 80,000 pounds of cherries, the grower would receive a diversion certificate for 1,600,000 pounds (80,000 pounds divided by 5 percent (.05) yields 1,600,000 pounds). The rest of the block would remain unharvested.

(2) For random row diversion, such estimated volume would be calculated by applying the percentage of the grower's production diverted to the actual average volume per acre of cherries produced and harvested. For example, a grower farms 1,000 acres and elects to divert 20 percent of the har-

7 CFR Ch. IX (1-1-06 Edition)

vestable acreage (200 acres). The grower harvests the remaining 800 acres and obtains 6,400,000 pounds of cherries, which represents a yield per acre of 8,000 pounds. Such grower would receive a diversion certificate for 1,600,000 pounds of cherries (8,000 lbs multiplied by the 20 percent of the total acreage diverted; in this instance, 200 acres).

Subpart—Administrative Rules and Regulations

§ 930.133 Compensation rate.

A compensation rate of \$250 per meeting shall be paid to the public member and to the alternate public member when attending Board meetings. Such compensation is a per meeting rate. For example, if a Board meeting is convened and lasts one or two days or only four hours, the public member and/or alternate public member attending the meeting would receive \$250 each.

[63 FR 33528, June 19, 1998]

§ 930.141 Delinquent assessments.

(a) Pursuant to § 930.41, the Board shall impose an interest charge on any handler whose assessment payment has not been received by October 1 of each crop year. The interest rate shall be a rate of one percent per month and shall be applied to the unpaid assessment balance not paid by the October 1 due date. In addition to the interest charge, the Board shall impose a late payment charge on any handler whose assessment payment has not been received within 90 days from the due date of October 1. The late payment charge shall be 10 percent of the unpaid balance.
